

Akran is dedicated to protecting the environment through increased efficiency and recycling, with the aim of contributing to sustainable development. In working towards this goal, Akran has focused on pollution prevention, resource conservation and environmental design to increase product value at all process levels. The company has undertaken numerous activities from a medium to long-term perspective, and has formulated and implemented a Green Management action plan, which stipulates key attainable targets.

- Promote Natural Source of Energy in manufacturing
- Incorporate Energy Management in various process
- Promote Biodegradable, Pre and Post-Consumer waste and animal waste manufactured products
- Promote vegetable based inks and chemicals
- Promote natural grown such as corn and cotton based manufactured products
- Use and Promote Recycling of Products
