

All of Akran's food and beverage containers meet FDA, US Federal agencies, Health Canada, and provincial agencies stringent food-grade product regulations. Temporary tattoos and other related products that fall under the Canadian Food and Drugs Act and FDA regulations are in full compliance with import notification (when applicable), ingredients disclosure and the product labelling requirements. As part of our quality control procedures, Akran ensures its products meet all federal and provincial import and health requirements.

The protection of your brand is our number one concern. With Akran, you can be fully confident that the products you receive are safe and completely in compliance. We ensure our products are in compliance with the Consumer Product Safety Council (CPSC), ASTM 936-07, and the Code of Federal Regulations (16 CFR 1303). The primary element of interest is lead, but a number of other toxic heavy metal elements also pose a threat, especially for children, as they are known to accumulate in the body and cause detrimental effects over time.

The following substances have to be banned from any of our product line we sell:

- Lead (Pb-free)
- Mercury
- Cadmium
- Antimony
- Arsenic,
- Barium,
- Cadmium,
- Chromium,
- Selenium,
- Mercury,

- Hexavalent Chrome
- Polybromated biphenyls (PBBs),
- Polybrominated Diphenyl Ethers (PBDEs),
- PentaBDEs and OctaBDEs

Akran provides material declarations and a Certificate of Compliance (COC) to clients upon request for each and every product we sell.
